Supplementary Methods

Supplementary Table S1. The three attention checks in study 2.

1. Research in attention shows that people, when answering questions, prefer not to pay attention and minimize their effort as much as possible. Some studies show that over 50% of people don't carefully read questions. If you are reading this question and have read all the other questions, please select the box marked 'other' and type 'attention' in the box below. Do not select "Coronavirus" Thank you for participating and taking the time to read through the questions carefully! What was this study about? ☐ Daily life activities Anxiety ☐ Coronavirus ☐ Other (please specify) _____			
<u>1. Correct response: other (please specify) attention</u>
